Emergency Contact:

How did you hear about my practice?

Are you sensitive to touch?

Do you have a particular area of concern? Is there anything that would be helpful for me to know? (Use the back, or as much space as you would like.).

Reiki healing can aid clients in manifesting health and wellness for themselves. It is a gentle, hands-on energy technique offering stress reduction and relaxation benefits. Reiki practitioners do not diagnose conditions, prescribe or perform medical treatment, prescribe substances or interfere with the treatment of a licensed medical professional. It is recommended that clients see a licensed physician or licensed health care professional for any physical or psychological ailment. Reiki does not take the place of medical care. While Reiki complements and enhances medical, psychological and spiritual care, the practitioner makes no claims about ability to cure illnesses or ameliorate psychological conditions. Reiki energy may cause changes in the body, including an uncommon healing intensity that can make acute conditions feel worse in the first few days after a session. Reiki can also cause a change in the need for prescription medication, which should be addressed by the prescribing physician. Long term imbalances may require multiple sessions to facilitate the body's own healing ability.

I understand the above and wish to engage in a Reiki Session with Diane Heath.
